HP Dynamic Security Features

Cartridge Policy: This feature protects the printer from counterfeit toner cartridges by allowing only genuine HP cartridges to be used with the printer. After enabling cartridge protection for the printer, all subsequent toner cartridges installed in the printer are automatically and permanently protected.

Cartridge Protection: his feature permanently associates toner cartridges with a specific printer, or fleet of printers, so they cannot be used in other printers. Protecting cartridges protects your investment. When this feature is enabled, if someone attempts to transfer a protected cartridge from the original printer into an unauthorized printer, that printer will not print with the protected cartridge. The printer control panel displays a message that the cartridge is protected, and it provides information explaining how to proceed.

To turn of the HP Dynamic Security Features in the **Web Browser**

Disable the Cartridge Policy feature
1. Start Web printer configuration in the browser by typing the printers IP address in the address bar.
2. In the **System** tab.
3. select the **Supplies Settings** in the left-hand pane.
4. In the **Cartridge Policy** section, select **Off**
5. Click **Apply**.
